# Dornier Do 24 T

**FULLY UPGRADED MOULDS**

The Dornier Do 24 was a broad-beamed hull flying boat designed to perform reconnaissance, bomber, maritime patrol, search and rescue duties. Developed by Dornier as replacement of the old "Wal", the new Do-24 was characterized by a power plant of three 940 HP Bramo wing-mounted radial engines. The solution adopted, much more modern and reliable than (...)

**SUPER DECAL SHEET** 4 versions    

The Macchi MB-326 was developed during the 50s and it has been conceived as a two-seat trainer to equip the Italian Air Force. MB-326 was powered by an English Bristol Siddley Viper non-afterburning turbojet engine with low air-intakes in the wing roots. Thanks to the effectiveness of the concept (...)

Decals for **4 versions**   
**Coloured Instruction sheet**

The Douglas P-70 night fighter was derived from the famous and popular light bomber, middle-mounted wings, A-20 Havoc, produced in large numbers by the American company Douglas during World War II. The first units of the night fighter had been delivered in the second half of 1942 to meet the need for a long-range fighter (...)

Decals for **2 versions** 

The Main Battle Tank Leopard, entered service in the mid-60s, has been the “backbone” of the Federal Republic of Germany armored units during the cold war. The Leopard role was critical : it would have to face the huge masses of tanks could be deployed by Warsaw Pacts armies. Thanks to its 10 cylinders, 37,4 litres, engine, it was able to reach 65 Km/h (...)
