SUPER DECALS SHEET - 6 versions

The Hawker Hurricane has been the most widely used fighter by the British Royal Air Force at the beginning of World War II. It has contributed significantly to the victory of the RAF during the Battle of Britain, but during the war, the role of front-line fighter has been gradually given by the more modern Spitfire. The Hurricane, however, has gradually changed its role thanks to the adoption of specific versions. The Hurricane Mk. IIC, in fact, has a significant armament formed by four 20 mm. cannons mounted in the wings (...) ► go to ***complete product sheet***

SUPER DECALS
for 2 versions

The 20-feet freight container is a key element for the international logistics. The 20-feet freight container, and the larger version and roomy 40-feet container, are in fact the international standard reference for all Countries. The standardize container in terms of size, volumes and loading capacity makes possible to optimize the intermodal freight by ships, trains and trucks (...)
